DR. FRASMUS WALSON, an eminent London physician, has taken on himself the charges of conveying the obelisk known as Cleopatra's needle from Alexandria to London. He has made the necessary arrangement with Mr. Dickson, a well known civil engineer, at an estimated cost of \$50,000. The obelisk will be surrounded with water tight and air tight casing of boiler plates, will have a wooden keel and an iron deck and will be towed through the Mediterranean by a powerful steamer.
